

PUBLIC NOTICE

The City Council will be holding an informational seminar during their regularly scheduled Council meeting at 6:00PM on April 4, 2022 in the Powell County Community Center. Kurt Thompson, Senior Engineer with Stahly Engineering and Associates, will be educating the City Council and the public on the purpose, funding sources, and goal of the "PASER" Street Maintenance Project. This project has been funded for the last few years through the Street Maintenance District levy, which was assessed based off property square footage. Interested parties are welcome to come learn about the reason for the project during the City Council meeting. Mr. Thompson, as well as the City Public Works Superintendent Trent Freeman, will answer questions you may have about the PASER project.
